Licence to operate a forklift truck

Industry Training Resources

Question 22

You are working near overhead electric power lines.

How can you find out their voltage?

Correct Answer

Find out who is responsible for the overhead electric power lines. Ask them what the voltage is.

Question 23

Visual indicators are used so that you can see overhead electric power lines.

Which visual indicators are used? Choose FOUR correct answers:

- Tiger tails
- Power line marker balls
- Marker of alternating colours such as orange and white
- Safety warning or danger signs

Question 24

What do you do if your forklift hits overhead powerlines?

Correct Answer

- Choose YES if sentence is correct. Choose NO if the sentence is wrong.
- Tell other people nearby to stay away. Yes
- Break contact with the electric lines if you can. Yes
- If there is water on the ground, leave the forklift. No
- If it is safe to do so, stay in the forklift. Yes
- Touch the forklift and the ground at the same time. No
- Report the accident. Yes
- Get the forklift checked before you use it again. Yes

Question 25

You might be using a forklift at night or in a dark area. What must you have?

Correct Answer

There must be enough lighting for you to work safely.

#### Question 26

What are the best types of forklift to use in a confined space?

Choose TWO correct answers.

- A hydrogen powered forklift.
- A battery powered electric forklift.

#### Question 27

Why is it dangerous to use a fuel powered forklift (petrol, diesel, LPG) in a space with little fresh air flow/oxygen?

Correct Answer

A petrol, diesel or LPG forklift will make dangerous fumes. You could be overcome by the gases and even die.

#### Question 28

When you are using your forklift there might be people and vehicles nearby. What control measures can you use to protect their safety?

Choose FOUR correct answers:

- Use a flag person to warn them.
- Use pedestrian or vehicle exclusion zones.
- Use barriers to block their path.
- Use flashing hazard lights.

#### Question 29

Which of the following can be a weather hazard when operating a forklift?

Choose FOUR correct answers:

- Hot weather could cause dehydration and heat stroke.
- Strong winds could blow the forklift over when the mast is raised.
- Smoke, mist or fog may make it difficult to see.
- Rain could make the surface slippery when working outside.

#### Question 30

Why is it important to get a weather forecast when planning the day's work?

Correct Answer

A weather forecast helps you to plan the day's work as conditions may change.
