# Purpose of this logbook

---

This logbook is to record on-the-job training. This logbook can be used in two ways:

## **1. A company doing in-house training**

A company can use this training logbook to show they have met their duty of care obligations under the OHS Act by showing evidence that an operator is trained and competent.

## **2. A registered training organisation (RTO)**

A registered training organisation (RTO) delivering the units of competency from the RII Resources and Infrastructure Industry Training Package can use this logbook as part of a training program to gain a qualification.

### **Supervision by a competent person**

The person supervising the operator must be deemed competent to supervise the training. The supervisor/trainer may hold an existing earthmoving licence or qualification, may have a Certificate IV in Workplace Training and Assessing, may have on the job experience gained over time, or any or all of these.

### **Using the logbook for verification of competency (VOC)**

As well as being a record of training, this logbook can also be used as a document to record verification of competency.

Element/Work tasks	Description of work/training performed
<p><b>PC 1.3</b></p> <p><b>Hazards and environmental issues</b></p> <p>Identify hazards and environmental issues, assess the risks and implement control measures in line with workplace policies</p>	<p><i>I looked around the site and found that a busy footpath was near my working area. People walking by might be at risk. I put up barricades and signs to warn people of the danger nearby. I then checked the grader. I checked oil, petrol and hydraulic fuel. I checked other parts of the grader. Everything was okay.</i></p>
	<p><i>I had to use the grader near a trench. The trench was about 2 metres deep. No-one had put up any warning signs or barriers. I put up a row of barricades 3 metres away the trench. This would give me a safe working distance and also keep other people away from the trench.</i></p>
	<p><i>The job plan said that I needed to use a ripper. I fitted this attachment on the grader.</i></p> <p><i>The work site is noisy. A jackhammer was being used nearby so I wore some ear muffs while I worked. I also put on other PPE including steel capped boots and a hard hat as there were safety signs telling me to wear these.</i></p>

Date/time	No. of hours	Machine details	Supervisor/competent person
